PROJECTS

>> Oops! I Killed It Again (OIKIA)

OIKIA is a MERN full-stack web-application that helps you to gather information about plants, save them in your list of favorites, visually organize your gardens and keep track of your plants' needs.

>> Achievements

- Implemented a complex MERN web-application
- Mastered vanilla CSS through Sass to make a beautiful UI
- Built a RESTful API for the plants data
- Implemented user authentication with JSON Web Token
- Implemented Agile project management in a team of 5 devs

>> Technologies

>> Stuff to Do()

StuffToDo() is a SPA that helps you getting things under control. If you easily forget things to do, just add a task to your list and do not forget to delete it once it is done! You can make more than one list to keep things organized.

>> Achievements

- Mastered CRUD and state management with useContext and useReducer Hooks
- Learned and implement Sass new features @use @forward
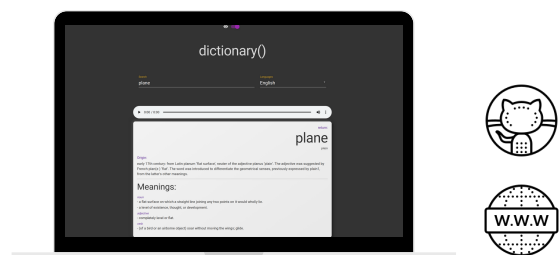

>> Technologies

>> Dictionary()

dictionary() is a SPA that helps you finding the meaning of any word you are looking for. dictionary() supports 12 different languages and can be also installed as PWA (Progressive Web Application) on mobile devices and desktop.

>> Achievements

- Mastered API fetching with fetch() async/await
- Learned and implement styling and React components with Material-UI
